Simon Hellsing

I'm a Swedish-born Digital Designer and Hyper Island graduate, currently based out of Stockholm.

While my main focus lies with Webdesign and Front-end Development, I'm in many ways a generalist, having experience working with Motion Design and Animation, Graphic Design, Illustration, Back-end Development and UX Design.

Since leaving New York this summer I've spent the last 6 months traveling and freelancing on my own, and I'm now really eager to find somewhere were I'll be able to work on challenging projects together with people that inspire me.

Work Experience and Education

July 2013 - Present
Stockholm

Freelance
Digital Designer

As a freelancer I've worked directly with clients, doing Branding, Webdesign, Front-end Development and Wordpress-integration.

October 2012 - June 2012
New York

Your Majesty
Design Squire

As a Design Squire at Your-Majesty I was given the opportunity to learn how longer projects involving extensive Ideation and Competitive Research are approched. Clients included Nintendo, X2PERFORMANCE, Ralph Lauren and Nature Valley.

June 2012 - October 2012
New York

B-Reel
Design Intern

While interning at B-Reel I worked on two major projects for Canon and Motorola, I also worked with design, ideation and pitch-work for clients like Google, Kanye West and Target.

February 2012 - May 2012
Stockholm

Acne Production
Design Intern

At Acne I got the opportunity to work on projects for H&M, Swedish Armed Forces, IKEA and Claes Ohlsson.

During my internship I also worked with Motion Design and Editing for the release of sister company Acne Play's iOS-game 'My Little Hero'.

August 2011- June 2012
Sweden

Hyper Island
Student

Focused on Concept Development and Project Management aimed towards the Digital- and Motion Design Industry.

August 2008 - August 2011
Stockholm

Leetab
Designer / Project Manager

Me and my childhood friend started Leetab as a way for us to develop our own web-based projects and services, as well as offer Webdesign and Web Development to local companies.

I was in charge of design and front-end development on all the projects we worked on.
